

Code of Conduct for Scooting and Cycling

Be seen

- Clothing - light, bright colours and reflective and fluorescent materials will help drivers and pedestrians see you better.
- Lights - by law, at night, you need at least one red light on the back and one white light on the front, as well as reflectors.

Wear it right

Cycle helmets should be worn when scooting and cycling. They should be done up securely and fit well.

Be heard

With a bell on your bike, you can warn others you're coming.

Be aware of others using the road

- Make sure others using the road have seen you - check by making eye contact with drivers where you can.
- Never squeeze between a large vehicle and the edge of the road - they definitely can't see you there. Also, be careful of vehicles turning left in front of you.
- When using a path that's designed for cyclists and pedestrians to share, make sure you leave space for pedestrians.

Don't forget to get off your bike or scooter at the school gates!!

BE SAFE, BE SEEN, BE CAREFUL !
